ASSEMBLY INSTRUCTIONS FOR THE TBS6000RD

ASSEMBLY TIP: Loosely tighten nuts and bolts at first. Fully tighten when the spreader is completely assembled.

Step 1

Attach the Tow Bar (3) to the center hole on the Cross Brace (6) using a 1/4 x 1-1/2 Hex Head Bolt (14) and a 1/4 Lock Nut (20). The Gear Case Bracket (37) is attached on top of the Tow Bar (3) and the Cross Brace (6).

Step 2

Attach the two Support Brackets (7) to the Wrap Around Support (4) using 1/4 x 1-1/2 Hex Head Bolts (14) and 1/4 Lock Nuts (20). Attach the other end of the two Support Brackets (7) to the Tow Bar (3) using a 1/4 x 2 Hex Head Bolt (13) and 1/4 Lock Nut (20).

Step 3

Attach the Control Cable Holder (5) to the top of the Tow Bar (3) using 1/4 x 2-1/4 Hex Head Bolts (12) and 1/4 Lock Nuts (20). Attach the two Clevis Plates (25) to the top and bottom of the Tow Bar (3) using 1/4 x 1-1/2 Hex Head Bolts (14) and 1/4 Lock Nuts (20). Insert the 1/2 x 1-3/4 Clevis Pin (39) through the holes in Clevis Plates (25). Secure this with a #14 Hitch Pin Clip (34). Attach the Control Cable (8) to the top of the Control Cable Holder (5) using a 1/4 x 2-1/4 Carriage Bolt (11) and 1/4 Wing Nut (23). Using a hammer, gently tap the two 7/8 Tube Plugs (24) into the open ends of the Control Cable Holder (5).

Step 4

To ensure proper function of the gear case, make sure the Spinner Shaft is perpendicular to the bottom of the Hopper. Adjustments can be made with the Eye Bolt that connects the Gear Case Bracket to the Gear Case Housing.

USING YOUR SPREADERS CONTROLLER

Settings are made by pushing down on the Calibration Indicator button and setting to the desired number on the Control Cable assembly.

SEE APPLICATION CHART FOR SETTING INFORMATION.

ON -- Push the Control Lever forward until it stops against Calibration Button.

OFF -- Pull Control Lever back until it stops.

BROADCAST SPREADER OPERATION

1. Always have the control lever in OFF position before filling the hopper.
2. Always pull the spreader forward to operate; do not operate in reverse.
3. Start moving forward before pushing the control lever to the ON position. Pull the control lever to OFF position before stopping or turning.

DO NOT allow spreader to sit stationary with material in the hopper and control lever in the ON position.

4. Pull the spreader at a steady speed (approximately 3 - 4 mph is recommended).
5. To avoid misses or striping, space each pass across the lawn so approximately 20% of the spread width overlaps onto the previous pass. This provides a feathered overlap to even out distribution over the width of the spread.

CAUTION: care must be taken with any weed killer, pesticide, or combination product. They can be harmful to other plant life in the yard.

Recommended operating weight \bar{n} 120 lbs.

MAINTENANCE INSTRUCTIONS

1. Empty hopper after each use. Do not store spreader with material left in hopper.
2. Wash spreader thoroughly and wipe dry.
3. Lubricate all moving parts. Use a grease gun to apply grease to the gearbox assembly. **CAUTION: Use a reasonable amount of grease. DO NOT pack gearbox full of grease.** Apply oil to spinner shaft (including area shaft extends through hopper), slide plate and where the spinner shaft and axle extend through the gearbox.

LIMITED WARRANTY

This unit is warranted against defects in materials and workmanship to the original purchaser, under normal use and service, for a period of ninety (90) days from date of sale. During the Warranty Period, we will repair or replace at our option free of charge to the original purchaser, any part of the Unit that our examination shows to be defective in workmanship or materials. This Warranty **Does Not** apply to damage caused by transit, misuse, abuse, neglect, accident, normal wear, or alterations by unauthorized persons.

**PLEASE DO NOT RETURN
THIS MERCHANDISE TO THE
STORE. CALL US AND WE
WILL TAKE CARE OF ANY
PROBLEM YOU MIGHT HAVE
WITH THIS PRODUCT.
